Subject: Re: Revised MeOH update for SAB webpage

Norm,

I think this is a straightforward message. I made a couple suggestions, shown in red.

We already put a new document number on the methanol noncancer assessment. The new number is
:EPA/635/R-11/001

Deliberative Process / Ex. 5

I'm fine with creating a new EPR webpage for the noncancer assessment; whatever will be clear to the public is fine with me.

Timing: I think we can release the draft noncancer assessment as soon as the NCEA IO agrees its ready to go (I hope this month). We could put the new text up on the IRIS and SAB websites then, and I think we should announce in the FR a public comment period (though whether we need another start to the public comment period is yet to be decided). We've sent forward a task order to get a contractor peer review panel put together; I'm not sure where that action is just now, but hopefully it won't take too long.

Thanks for your help with this - it is greatly appreciated. I'm copying Vince too so he's aware of the communication plans with SAB.

John

Subject: Revised MeOH update for SAB webpage

The update we worked on before needed some changes to work on the SAB webpage. The proposed text below in blue would go on the "background" section of the present SAB methanol webpage (<http://yosemite.epa.gov/sab/sabproduct.nsf/02ad90b136fc21ef85256eba00436459/92595b35325a7b748525750100>)

5d8a2d!OpenDocument&TableRow=2.0#2.). In writing the text below I assumed that the peer review mechanism for the cancer assessment was not decided. How does this sound to you guys?:

Deliberative Process / Ex. 5

Deliberative Process / Ex. 5

Deliberative Process / Ex. 5

On a separate note, I got Maureen Johnson's perspective on document numbering and web pages for MeOH. For simplicity on the website and EIMS she suggests that we create a new document number and new EPR website for the non-cancer assessment. She also suggests we use the number on the current assessment for the upcoming cancer assessment. The current assessment ends with an "A" and for the new one we'd change it to a "B". The old webpage and document would be archived so there would be a record for future generations.

Thanks

NB
